

Individual Fellowship Schemes: NCMM seeks expressions of interest

The Centre for Molecular Medicine Norway (NCMM) is calling for expressions of interest from postdoctoral researchers who would be interested in developing a fellowship funding application to pursue their research project at their centre in Oslo.

NCMM is currently accepting fellowship applications from researchers with a great track record for schemes such as (for example), the [Marie Skłodowska-Curie \(MSCA\) European and Global Fellowships](#).

NCMM is an international biomedical research centre based at Oslo Science Park, with an overall objective of translating basic medical research into clinical practice. The centre is part of the University of Oslo's interdisciplinary focus on life science.

NCMM is also the Norwegian node in the Nordic EMBL Partnership for molecular medicine.

The centre offers outstanding opportunities for researchers looking to establish and develop their careers.

NCMM currently has 9 research groups, focusing on:

- Bio-nanotechnology
- Cancer
- Cell biology/Cell cycle
- Drug discovery
- Gene regulation
- Stem Cells
- Structural biology

To apply

If you would be interested in developing a fellowship application or have any questions, please email to Elisa Bjørge, Chief Administrative Officer, at elisa.bjorge@ncmm.uio.no

NCMM will provide support and guidance to help develop promising applications.
